

About AirMed

AirMed Canada Systems Inc., headquartered in Victoria, British Columbia, develops seed-to-sale business solutions for the Canadian cannabis industry. Back in 2014, a group of tech visionaries recognized the opportunities in the emerging cannabis industry in Canada and began building the AirMed software system. Originally designed to help licensed producers meet compliance, AirMed has evolved into a comprehensive business management solution for the Canadian cannabis industry.

-  **Cloud-based SaaS Application**
-  **Responsive/Mobile Enabled**
-  **Updated Automatically**
-  **Secure Data Protection**
-  **Integration & Interoperability**
-  **Fully Compliant with Cannabis Act**

AirMed's founders have decades of experience in the technology sector with expertise creating business-to-business applications for highly regulated industries including pharmaceutical, healthcare, law enforcement and financial services.

A dynamic group of developers and customer service personnel make up your AirMed team. We go the extra mile for both large and small producers with a team of seasoned experts dedicated to helping you cultivate success. You can rely on us to be there when you need us.

From integration with third-party systems to guidelines for amending standard operating procedures, AirMed staff can assist you at every stage of Health Canada licensing and success in production.

AirMed customers have access to a comprehensive sandbox to learn and hone their skills using the full

range of features. And AirMed software is hosted in a PCI-compliant security environment at a premier Canadian Tier-3 data centre with guaranteed uptime and full business continuity/recovery.

Our cloud-based software is designed specifically for the Canadian cannabis industry. Secure and fully Cannabis Act compliant, AirMed manages and integrates all business resources and functions from facilities and inventories through to financials and personnel.

We've been developing AirMed since 2014, and we believe no other seed-to-sale platform offers the range our software does. With unique features for cannabis growers, processors and distributors, AirMed unifies operations across departments, workflows and data in a single system. A streamlined interface lets you focus on optimizing your business while managing all aspects of compliance.

We're transforming the way the cannabis industry purchases technology. To help our clients cultivate success, AirMed has strategic partnerships with leading vendors of equipment, supplies and services. Our AirMed Ecosystem lets you purchase hardware and software in a turn-key solution for your cannabis business.

AirMed offers the tools you need in the office, the greenhouse or on the loading dock. Each product selected for the AirMed Ecosystem is carefully chosen based on its ability to provide value, lower

production costs and increase competitiveness for AirMed customers. You create the package that's right for you from pre-configured hardware and software.

We used our expertise in other highly regulated industries to create a mission-critical seed-to-sale solution that facilitates compliance and best practices for your cannabis business. Our dedication to your success results in a partnership approach to our client relationships. This commitment is why there is a growing list of Canadian licensed

producers using AirMed. AirMed offers the control, visibility and insight to not only meet compliance but to take your business to the next level. Wherever your business fits in the supply chain, AirMed will help you cultivate success.

Our AirMed Ecosystem Partnering Program

The AirMed Ecosystem is designed to help licensed producers cultivate success with a pre-configured, fully compatible business solution that includes industry-leading hardware and software. Our goal is to help our customers reach their potential in all areas of their businesses by providing the best solution to cultivate success. Each product has been carefully selected based on its ability to provide value, lower production costs and increase competitiveness.

Environmental Chambers

We've partnered with a designer, manufacturer and installer of controlled environmental chambers that offer precise control of temperature, humidity, gas, and lighting. These chambers are ideal for cannabis production.

Industrial Tablets

AirMed recommends industrial tablets for use in your cannabis business. These ruggedized handheld devices are waterproof and dust proof and can withstand a drop from five feet on a concrete floor.

Scales & Moisture Analyzers

Accuracy and precision are critical in weighing cannabis products. Our partners offer legal-for-trade scales and moisture analyzers that range in precision, capacity, readability and size.

Printers & Scanners

We partner with the industry's leading suppliers of label, barcode and tag printers. These equipment vendors offer the products you need to meet mandated compliant labeling requirements.

Sensors & Detection

Our goal is to help you create the optimal grow operation and improve crop decision-making using real-time environmental data. Our partners offer both environmental sensors and pathogen detection.

Business Services

We partner with providers of a completed range of services from technology & security vendors, through quality & compliance management consultants, to payment solutions, shipping providers and market platforms.
