

Introducing Automated Health Canada CTLS reporting

With the April release of AirMed, a new CTLS report is available to automate the time-consuming task of populating data in the required monthly report.

Fully Compliant with Cannabis Act+

Audit Trails

2300+ Reported Fields Tracked

Full Export to CTLS Template

CTLS Summary Reports

Updated Automatically

Saving time, saving money

Until now, the process of populating CTLS data was time consuming with the potential for data entry error. AirMed tracks thousands of the fields required for monthly reporting, and now this data is automatically populated in the CTLS Worksheet Tool.

AirMed will continue to expand the scope of this report with the goal of automating the reporting of every field required by Health Canada.

Reporting in AirMed

AirMed offers comprehensive reporting for both business intelligence and compliance. Hundreds of pre-built reports are available for sales, clients, inventory, production and more. AirMed can manage multiple client facilities and data can be partitioned to each respective facility.

Compliance reports are updated when regulations change, so they automatically have the information Health Canada and other regulators want now. Sub-reports detail how the data for the main reports was derived.

Reports provide numerous views of the data and combine to give a complete picture of the current state of all material in the facility.

CTLS Reports

As mandated by the Cannabis Act, Health Canada requires that licensees submit a Cannabis Tracking and Licensing System (CTLS) report every month for every licensed site. This applies to cultivators and processors (including micro, standard or nursery), as well as sellers of medical cannabis and provincial or territorial authorities, distributors and retailers. Licensees can complete CTLS reports manually online or a .csv form can be uploaded.

Full CTLS Export

Always innovating to help our customers meet the regulatory challenges they face daily, AirMed offers a built-in system for CTLS reporting.

We've created an automated process to export all available CTLS data stored in AirMed into the standard spreadsheet template provided by Health Canada. This reduces the time required to complete monthly CTLS reporting and eliminates the potential for human error often encountered in manual data entry.

AirMed uses the most recent monthly reporting template provided by Health Canada for the exported spreadsheet, which includes all the same guidance, instructions, fields and calculations. Currently, AirMed supports close to 2,000 of the fields that are in the Health Canada template.

Summary Reports Detail Reports

CTLS Full Export (by Date)
CTLS (Cannabis Tracking and Licensing System) - Monthly Report export to Excel template supplied by Health Canada

CTLS Seeds - Summary (by Date) [Details]
Provides a summary for the Seeds CTLS report. This report will show a summary of how each field is calculated.

CTLS Vegetative Plants - Summary (by Date)
CTLS (Cannabis Tracking and Licensing System) - Monthly Veg Plants Report

CTLS Whole (Flowering) Plants - Summary (by Date)
CTLS (Cannabis Tracking and Licensing System) - Monthly Whole (Flower) Plants Report

CTLS Fresh - Summary (by Date) [Details]
Provides a summary for the Fresh CTLS report. This report will show a summary of how each field is calculated.

CTLS Dried - Summary (by Date) [Details]
Provides a summary for the Dried CTLS report. This report will show a summary of how each field is calculated.

CTLS Pure Intermediates - Summary (by Date) [Details]
Provides a summary for the Pure Intermediates CTLS report. This report will show a summary of how each field is calculated.

CTLS Ingested Extracts - Summary (by Date) [Details]
Provides a summary for the Ingested Extracts CTLS report. This report will show a summary of how each field is calculated.

CTLS Inhaled Extracts - Summary (by Date) [Details]
Provides a summary for the Inhaled Extracts CTLS report. This report will show a summary of how each field is calculated.

CTLS Other Extracts - Summary (by Date) [Details]
Provides a summary for the Other Extracts CTLS report. This report will show a summary of how each field is calculated.

CTLS Hemp - Summary (by Date) [Details]
Provides a summary for the Hemp CTLS report. This report will show a summary of how each field is calculated.

CTLS Other Monthly Report
CTLS (Cannabis Tracking and Licensing System) - Monthly Other Report

Quarterly Inventory (by Strain)
This report will display a fully detailed report showing all cannabis inventory in the facility for each quarter. Inventory is grouped by strain.

All Practitioners (with Patient data)
This report will display all practitioners in the system along with all patients that have been prescribed.

Shipments (by Lot)
Recall report that will display all shipments that have been delivered. Filtered by Lot.

Summary CTLS Reports

In addition to the new CTLS Full Export functionality, AirMed also includes a suite of CTLS summary reports. These provide a more comprehensive view of CTLS report data by offering detailed breakdowns of key fields.

Summary reports include direct links to the detail report associated with each field. You can not only identify the values used to calculate a final total on the CTLS, but also find the exact inventory records used to calculate those values, all from one page.

Inventory validation has never been easier.
